

## VOLUNTARY GREEN PRICING RENEWABLE ENERGY PROGRAM

A Voluntary Green Pricing program is available to all customers of the City of Charlevoix Electric System. This program allows a customer to voluntarily pay extra on their electric bill in order to have a percentage of their electric usage be offset by renewable energy sources. A customer must choose what portion of their load will be offset by renewable energy (25%, 50%, 75%, or 100%) and then will be charged extra for that amount of energy usage. For more information and to sign up for the program please visit this website:

<http://www.mpower.org/renewable-sign-up?type=ALL&member=CHAR>

By signing up you are agreeing to pay extra on your monthly electric bill. The price for this program at the present time is an additional penny (\$0.01) per kilowatt-hour of usage. For example, if you sign up for 75% renewables and your usage for the month is a total of 1,000 kWh, then you would pay an extra \$7.50 on your bill that month (1,000 x 75% x 0.01).

If you sign up for this program you must wait a minimum of 6 months before you will be able to change your selection or discontinue participation. To change your selected percentage or to discontinue your participation please send an email to [dons@charlevoixmi.gov](mailto:dons@charlevoixmi.gov). Include your account number and the requested change. The change will become effective after the 6 months has passed.
